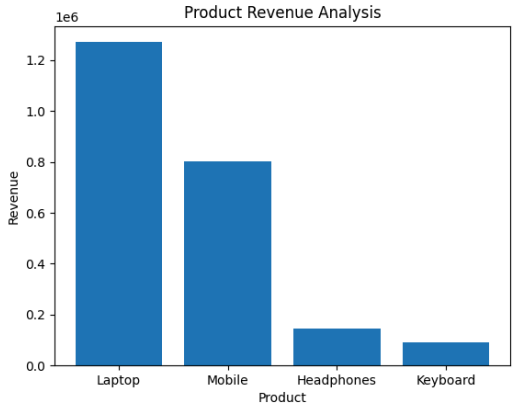
PRODUCT REVENUE ANALYSIS

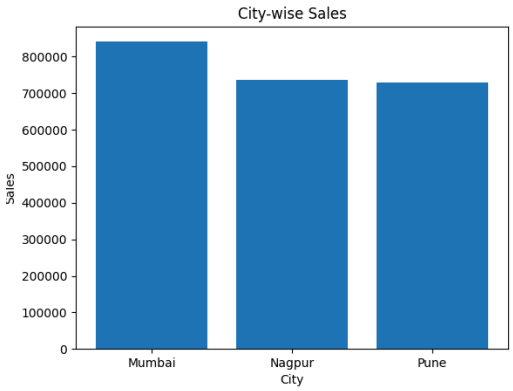
Product	Revenue
Laptop	12,71,000
Mobile	8,03,000
Headphones	1,45,900
Keyboard	89,600
Total	—



Insight:
Laptops generate the highest revenue, followed by mobiles. Accessories like headphones and keyboards contribute significantly less. This shows that high-value products dominate total sales.

CITY-WISE SALES ANALYSIS

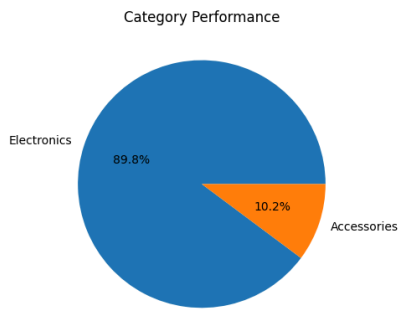
City	Sales
Mumbai	8,41,250
Nagpur	7,37,750
Pune	7,30,500



Insight:
Mumbai records the highest sales, followed by Nagpur and Pune. This indicates that metro cities contribute more to overall revenue.

CATEGORY PERFORMANCE

Category	Revenue
Electronics	20,74,000
Accessories	2,35,500



Insight:
Electronics dominate the sales, contributing the majority of revenue, while accessories play a minor role.

SALES TREND OVER TIME

Insight:
The sales trend over time shows **high variability with frequent fluctuations** rather than a steady pattern. There are multiple sharp peaks where sales reach above ₹1,40,000–₹1,50,000, followed by sudden drops to much lower values.

These spikes are primarily driven by **bulk purchases of high-value products like laptops**, while the lower points correspond to **smaller transactions involving accessories** such as headphones and keyboards.

Overall, the trend indicates:

- Sales are **transaction-driven**, not time-driven
- There is **no consistent upward or downward trend**
- Revenue is heavily influenced by **occasional high-value orders**
